Security Lock Value, Masterkeyed

Tried and tested standard-notebook lock, for lock systems

A notebook can be stolen in an instant. Expensive hardware and important data are lost. This can also involve a lot of work and great expense. Police, insurance, data recovery etc. DICOTA lock systems are designed for professional business use. An integrated solution is designed and manufactured specifically for you.

This DICOTA lock fits thanks to the integrated rubber bumper for almost all standard lock slots. Notebooks, projectors, printers and monitors can be effectively secured. With a length of 200cm and a diameter of 5.2 mm, the steel cable is designed to be extra-long and extra strong. Two keys are included. Thanks to the “push-to-lock“ function, the lock can also be secured without a key. This lock is used in a superordinate lock system which allows access for individual users as well as the system administrator. Each system is individually designed and manufactured specifically for you. Your DICOTA partner will be pleased to discuss the details with you.
